PricewaterhouseCoopers Acceleration Centers (PwC AC)	Bengaluru, Karnataka
<ul style="list-style-type: none">• Job Shadowed to assist in the development and maintenance of web applications using ReactJS and JavaScript.• Gained experience in responsive design and cross-browser compatibility.• Completed internal courses and company sponsored LinkedIn Learning courses for web development.	

PROJECTS

Card Style Tab Search - HTML, CSS, JavaScript	(See it Live)
Inspired by personal challenge to efficiently switch back to required tab out of 100s of tabs open in browser, built a fully functional and responsive browser extension using HTML, CSS and JavaScript.	
Quick Bookmarks Finder - HTML, CSS, JavaScript	(See it Live)
Again, taking inspiration from personal challenge to find that one particular bookmark out of 1000s of bookmarks accumulated over the years, built quick bookmarks finder browser extension using HTML, CSS and JavaScript.	
Full Stack Blog App - Next.JS, Prisma (MongoDB), Firebase, NextAuth	(See it Live)
A blogging web application built with Next.js and Prisma (MongoDB), where users can authenticate themselves with their Google or Github Account and start writing blogs. This app scores 98% for performance rating and 100% for best practices and SEO in Google PageSpeed Insights.	

ACHIEVEMENTS

<ul style="list-style-type: none">• Volunteered for the firm initiative to build an internal tool for resource management along with 5 other team members.• Termed as one of the most dependable team members in the performance review.
